To: Special Distribution  
From: Daniel DiDomenico, CCTS Technical Papers Chairman

Subject: Call for Technical Papers

This year's theme for the 2007 CCTS Space Congress will focus on promoting education and academic awareness for technical and scientific programs; to encourage younger generations to understand and seek out careers in the aerospace industry. To support this theme, DOD, NASA, and other government agencies are being invited to attend along with educators, students, society members, space activists, amateur rocketeers, and the growing commercial spaceflight industry.

Our goal will be to bring together the best in the commercial and private spaceflight industries to motivate new generations of space pioneers to focus onto a common global goal to reach to the stars to help solve some of the problems at home.

The title for the Forty-Second Space Congress will be "Growing the Next Generation of Scientists and Engineers". Suggested topics for the Technical Paper Sessions include the following:

- Aspects of Personal Commercial and Human flight Industry.
- Astronaut simulation training technology
- Facility Requirements and Ground Support Equipment For Spaceports
- Mars Exploration Technology
- Finance concepts supporting Lunar Exploration
- Propulsion Solutions needed for Planetary Travel
- Supporting Technical Topics

This call invites persons wishing to offer papers to submit a 200-word abstract to Daniel DiDomenico, Canaveral Council of Technical Societies, 1980 N. Atlantic Ave, Ste. 401, Cocoa Beach Florida 32931. The Technical Review board will also consider additional technical papers concerning education, commerce and professional development. The deadline for abstracts is November 20, 2006. Those submitting abstracts will be notified of their acceptance by mid-December along with instructions and format requirements.

Papers in final form must reach this office by January 31, 2007. Papers not received by this deadline will not be published by the Congress.

Please circulate this letter throughout your organization. For additional information please call 321-868-1623 and leave a message for Daniel DiDomenico or one of the CCTS Space Congress Staff, or email at [cctsoff@bellsouth.net](mailto:cctsoff@bellsouth.net). Your questions will be answered as soon as possible. For quicker response you may also email Daniel DiDomenico at [dand@bluemarble.net](mailto:dand@bluemarble.net).

Sincerely,

Daniel DiDomenico
